Portfolio

CAREER OBJECTIVE

I am a graduate in BSc Computer Science from University of Bedfordshire, with a strong academic background and passion for exploring emerging technologies. I am particularly interested in Software Engineering, full-stack development, Quality assurance, and creating efficient, user-friendly web applications. With experience in projects using React, Node.js, Spring Boot, MySQL, Java, Python, and JavaScript, I aim to contribute to impactful solutions and gain professional industry experience. Driven by adaptability, creativity, and continuous learning, I aspire to become a skilled Full-Stack Software Engineer, Quality Assurance or Data Scientist in a collaborative environment.

EDUCATION

University of Bedfordshire

BSc (Hons) in Computer Science

2025 - 2026

Colombo

- First Class Honours

SLIIT City Uni

Higher National Diploma in Information Technology

2022 - 2025

Colombo

PROJECT EXPERIENCE

ReUselt - AI-Powered web application that transform waste into creative craft

MERN Stack (MongoDB, Express.js, React.js, Node.js), TensorFlow, Python

October 2025 – April 2026 (AI-Powered Web Application)

- Developed an AI-powered sustainability platform using the MERN stack, TensorFlow, and Python to classify waste materials through image recognition, recommend DIY craft ideas, and promote environmental sustainability through creative reuse. Implemented features including user authentication, an AI chatbot, a community sharing platform, real-time messaging, and an admin dashboard.

Rolex Cakes and Bakery

MERN Stack (MongoDB, Express.js, React.js, Node.js)

January 2026 - March 2026 (Web Application)

- Developed a full-stack bakery management system using the MERN stack to streamline product management, customer orders, inventory tracking, and sales operations. Implemented secure user authentication, shopping cart functionality, order management, and an admin dashboard for efficiently managing products, orders, and customer information.

Heart Pulse – MERN Stack Game with Heart API Integration

MERN Stack (MongoDB, Express.js, React.js, Node.js), Heart API

📅 September 2025 - December 2025 (Web Application)

- Developed an interactive heart counting game using the MERN stack and Heart API, featuring secure user authentication, real-time gameplay, score tracking, a leaderboard, and responsive user interfaces. Implemented game logic, player progress management, and database integration to store scores and enhance the overall gaming experience.

QuickBite

React Native, Node.js, Express.js, MongoDB

📅 May 2024 - September 2024 (Mobile Application)

- Developed a food ordering mobile application using React Native, Node.js, Express.js, and MongoDB, enabling users to browse restaurants, order food, manage carts, and track order status, while providing an admin panel to manage menus and customer orders.

TUVOKA - Musical Instruments E-Commerce Platform

PHP, MySQL, JavaScript (AJAX), HTML, CSS

📅 April 2025 - September 2025 (E-Commerce Web Application)

- Developed a premium musical instruments e-commerce platform using PHP, MySQL, JavaScript (AJAX), HTML, and CSS, enabling customers to browse products, manage carts, securely authenticate, and place orders. Implemented user authentication, AJAX-based cart functionality, dynamic pricing, order management, and an admin dashboard for managing products, categories, customers, and sales.
